CYRISTAL N. JOSEPH

Cybersecurity | Investigations | Privacy | Legal & Regulatory Compliance
New York, NY | cyrisjoseph@outlook.com | linkedin.com/in/cyristalj/ | github.com/cyristal-gems | cyrisjoseph.dev

Cybersecurity and Risk Management professional with experience in security operations, incident response, threat intelligence, governance, risk and compliance (GRC), and investigative analysis across complex enterprise environments. Demonstrates analytical thinking, sound judgment, effective communication under pressure, and a commitment to public service through crisis intervention and continuous professional development. Focused on the intersection of law, cybersecurity, privacy, national security, and regulatory compliance.

EDUCATION

ABA-Approved Paralegal Studies Certificate Program — *Expected 02/2027*
Maurice A. Dean School of Law at Hofstra University — **Hempstead, NY**

Bachelor of Arts (B.A.), International Political Economy & Diplomacy and Religion & Politics
University of Bridgeport — **Bridgeport, CT**

PROFESSIONAL EXPERIENCE

Security Operations Center Analyst — *03/2026 to present*
NBCUniversal — **New York, NY**

- Analyzed real-time security events across 220+ integrated surveillance and alarm systems to detect, assess, and escalate potential threats in alignment with incident response protocols
- Generated and maintained audit-ready incident reports and activity logs, documenting 16+ daily security events to support compliance, risk management, and investigative efforts
- Orchestrated cross-functional incident response communications, ensuring rapid escalation and coordination of high-priority security events to minimize operational impact
- Identified patterns across recurring security incidents, contributing to improved threat detection capabilities and strengthening proactive risk mitigation strategies

Global Security Command Center Analyst — *02/2023 to 03/2026*
BlackRock — **New York, NY**

- Improved threat detection accuracy by 30% through use of open intelligence sources, geolocation tools, and global monitoring platforms to identify credible threats impacting enterprise operations
- Achieved 83% resolution efficiency within a 5-minute response window for high-priority incidents, supporting rapid containment and minimizing operational disruption
- Reduced travel-related risk exposure by 11% through analysis of global threat patterns and proactive mitigation adjustments aligned to organizational risk tolerance
- Monitored real-time security alerts, assessed incident severity, and escalated emerging threats according to established incident response procedures
- Translated threat intelligence findings into actionable insights supporting organizational resilience and continuous risk mitigation efforts

Automation Systems Administrator — *11/2022 to 02/2023*
Capsule — **New York, NY**

- Identified and remediated system vulnerabilities contributing to a 21% improvement in pharmaceutical fulfillment delivery performance
- Increased operational resilience by 13% through preventative maintenance planning across automated robotics and sensor-based fulfillment systems
- Documented technical issues, root causes, and remediation steps to improve system reliability and support continuous operational efficiency
- Applied risk-aware troubleshooting techniques to maintain stability of automated infrastructure and reduce disruption risk

Fixed Building Security — *01/2022 to 10/2022*
Madison Square Garden Entertainment Corp — **New York, NY**

- Reduced security risk exposure by 10% through proactive monitoring, screening, and triage of high-volume event activity involving 4,000+ attendees
- Identified and escalated vulnerabilities impacting facility security operations, contributing to improved protective security posture
- Supported safe execution of high-profile events by maintaining situational awareness and enforcing security protocols

Security Officer — *12/2018 to 01/2022*
CBS — **New York, NY**

- Strengthened incident response coverage through continuous CCTV monitoring and real-time escalation of suspicious activity

- Reduced unauthorized access incidents by 8% through enhanced identity verification and controlled entry procedures
- Supported enforcement of access control protocols protecting personnel, facilities, and organizational assets

PUBLICATIONS

Lead Writer *05/2026 to present*

Narrative Damage (Substack)

Independent publication exploring how narratives shape empathy, identity, violence, and spectacle in the digital age.

- Research and develop original essays examining contemporary issues through critical analysis of media, culture, and public discourse.
- Draw on current events, academic scholarship, and historical context to support research-informed commentary and analysis.
- Investigate how narratives influence public perception, identity formation, justice, and systems of power.

VOLUNTEER EXPERIENCE

Crisis Counselor *03/2026 to present*

Crisis Text Line **Remote**

- Provided confidential crisis intervention and emotional support to individuals experiencing mental health crises through text-based communication.
- Applied active listening, de-escalation, and evidence-based intervention techniques to assess risk and help individuals develop immediate safety plans.
- Navigated high-pressure situations requiring sound judgment, empathy, and adherence to strict confidentiality standards.
- Collaborated within established crisis response protocols to connect individuals with appropriate community and emergency resources.

CERTIFICATIONS

CompTIA Security+ | AWS Certified Cloud Practitioner | CompTIA A+ | Google AI Essentials Certificate | Google Business Intelligence Certificate | Google Cybersecurity Certificate | Google IT Support Certificate | Google Project Management Certificate | Lean Six Sigma Green Belt

PROJECTS

(All projects available to view on GitHub; featured projects highlighted in portfolio)

Cyber Threat Timeline

Tools: HTML5 | CSS3 | JavaScript (D3.js)

- Researched and curated major cybersecurity incidents spanning more than three decades, organizing complex technical information into an interactive public resource.
- Analyzed cyberattack trends by year, industry, and attack type to highlight evolving risks and the broader impact of security incidents.
- Designed responsive data visualizations to improve accessibility and communicate technical information to both technical and non-technical audiences.
- Demonstrated the ability to synthesize large volumes of information into a structured, evidence-based presentation.

Black Missing Persons Intelligence Database

Tools: Python 3 | Splunk Enterprise (SPL) | JavaScript | JSON | GeoJSON

- Developed a searchable public-data platform documenting missing Black individuals across the United States using structured case records and publicly available information.
- Organized and analyzed case data to support searches and comparisons by location, age group, gender, and case status.
- Built interactive geographic visualizations and analytics to make complex missing-persons data more accessible and understandable.
- Designed the platform with an emphasis on accessibility, transparency, and responsible use of publicly available information.

PROFESSIONAL AFFILIATIONS

American Bar Association (ABA) *07/2026 to present*
International Association of Privacy Professionals (IAPP) *07/2026 to present*
